

North Fork Deer Creek THP

Vicinity Map

Section 31, T17N, R10E, MDB&M - Nevada County, California

LEGEND

- THP plan area
- Roads (TIGER)
 - State highway
 - County / local road
- Planning watersheds (CalWater 2.2)
- Lakes / reservoirs (NHD)
- Cities / towns

NOTES

Plan area is approx. 6 mi NE of Nevada City via State Route 20 and Casci Ranch Road, on the ridge between the North Fork Deer Creek and Scotts Flat Reservoir.

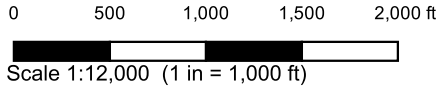

Planning watershed: CalWater 2.2 boundaries shown; the plan area drains to the North Fork of Deer Creek (Deer Creek HA, Yuba River basin).

Nearest fire station: CAL FIRE Nevada-Yuba-Placer Unit. Fire protection: State Responsibility Area.

Plan Area, Ownership & Legal Description

Section 31, T17N, R10E, MDB&M - Nevada County, California

LEGEND

- THP plan area boundary
- PLSS sections

Land ownership (BLM SMA)

- Private
- US Forest Service
- Bureau of Land Management
- State of California

Roads (OSM)

- State highway
- County road
- Existing local / ranch road
- Existing logging / seasonal road

Watercourses (NHD)

- Class I watercourse
- Class II watercourse
- Class III watercourse
- Lakes / reservoirs (NHD)
- Canals / ditches (not watercourses)

Contours (100 ft)

- 500 ft index contour
- 100 ft contour

NOTES

Plan area: 623.9 acres, all of Section 31, T17N R10E, MDB&M (BLM CadNSDI).
Timberland ownership is private; adjoining federal lands (Tahoe National Forest / BLM) are shaded.

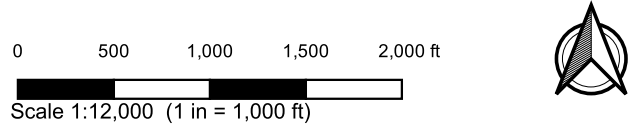

Access: Casci Ranch Road from State Route 20. Existing seasonal logging roads are shown from OpenStreetMap and must be field-verified.

Contours at 100 ft intervals from the USGS 3DEP 1/3" arc-second DEM; elevations range approx. 2,400 - 3,200 ft.

State highway

County road

Existing local / ranch road

Existing logging / seasonal road

NOTES

Watercourses classified from USGS NHD flow regime: named perennial = Class I (2,653 ft), unnamed perennial and intermittent = Class II (11,302 ft), ephemeral = Class III (33,707 ft). Classification is provisional pending RPF field verification of fish/aquatic life per 14 CCR 916.5.

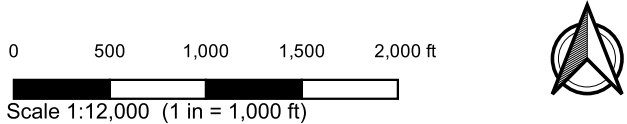

WLPZ widths per 14 CCR 916.5 Table 1 by side slope (<30 / 30-50 / >50 %): Class I 75/100/150 ft, Class II 50/75/100 ft; Class III ELZ 25/50 ft. Zones total: Class I 32.4 ac, Class II 26.1 ac, Class III ELZ 52.7 ac.

Existing crossings X1-X9 on Class I/II watercourses require inspection and, where needed, upgrade to 100-year flow.

Silviculture, Yarding & Operations

Section 31, T17N, R10E, MDB&M - Nevada County, California

LEGEND

- THP plan area boundary
- Harvest units
- Commercial Thin - tractor yarding
- Selection - cable yarding
- Proposed landings
- Watercourse crossings (existing)
- Roads (OSM)
- State highway
- County road
- Existing local / ranch road
- Existing logging / seasonal road
- Watercourses (NHD)
- Class I
- Class II
- Class III
- Watercourse protection zones
- Class I WLPZ (75-150 ft)
- Class II WLPZ (50-100 ft)
- Class III ELZ (25-50 ft)

NOTES

Silviculture: Commercial Thin (14 CCR 913.3) on tractor ground < 50 % slope, 429 ac in 4 units; Selection (913.2) with cable yarding on slopes > 50 %, 105 ac in 3 units.

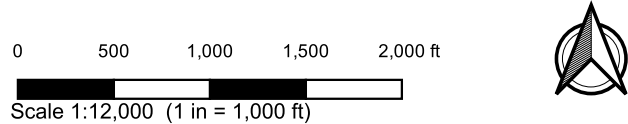

No timber operations within Class I/II WLPZ except as allowed under 916.4; Class III ELZ - no heavy equipment.

Landings L1-L6 are proposed on existing roads at ridge-top locations outside all protection zones. Existing roads only; no new road construction proposed. Season of operation: dry season (May 1 - Oct 15) with winter period restrictions.

NOTES

USDA NAIP orthoimagery (most recent available from the USGS National Map image service), 1 m resolution.

Harvest unit boundaries follow slope breaks and watercourse protection zones derived from the 3DEP DEM; canopy conditions visible here support the commercial thin prescription in the mixed conifer stands on the ridge and the selection prescription on the steep canyon side slopes.
